Regional Safety Manager – Houston, TX

Great Lakes Dredge and Dock Co. LLC is a specialty dredging contractor based in Oak Brook, IL, with regional offices and projects throughout North America. Our experience enables us to adapt quickly to unique problems and resolve potentially costly situations for our clients. In addition, we have the proven ability to customize systems and management teams for individual projects.

Employees are an integral part of ensuring our success, and as such, our staff is required to meet the highest expectations. We take pride in our renowned safety standards and require employees to utilize safe work practices always. We count on our employees to perform in fast-paced environments while still satisfying customer needs and maintaining effective working relationships. The ability to proactively identify issues and offer innovative solutions is also expected from our employees. We are committed to our employees and, in turn, expect our employees to contribute to the success of Great Lakes Dredge and Dock.

Job Summary:

Under the general supervision of the Director of Health, Safety and Environmental, the Regional Safety Manager will directly report to the Senior Vice President of the Gulf Region and be responsible for monitoring, coordinating and managing the company safety programs. As well as directing personnel and managing safety resources at the divisional level.

This position will be based out of the Houston, TX office and will support the Gulf Region.

The ideal candidate must have strong communication skills, both verbal and written, as well as, prior experience presenting information in a professional manner to external clients, craft field personnel, and all levels of the management team, including senior leadership. This person will have proven to be successful at building rapport and sustaining productive and open internal and external relationships.

Essential Duties & Responsibilities:

- Ensures regional operations are planned and conducted in a safe and complaint manner in accordance with regulations & policies
- Manage field safety personnel in support of regional operations (as assigned)
- Represent Great Lakes Safety Department in a professional manner and be onsite point of contact for employees, clients and regulators
- Monitor trending and conduct inspections, audits and manage corrective actions in regional facilities and on project sites
- Coordinate, conduct and document safety trainings, meetings and incident review meetings
- Provide technical safety solutions, develop safety plans and submittals, and procurement of safety equipment or supplies
- Perform basic administrative duties using Microsoft Office Suite
- Other tasks as assigned
